PROFILE

I am a curious and ambitious problem solver based in Gothenburg, Sweden.

EMPLOYMENT

Developer / DevSecOps Engineer
SAAB   Gothenburg, Sweden   Aug 2023 - Ongoing

- I worked in an IT compartment called Software Factory, mainly working with developing and setting up CI/CD pipelines and servers.
- The job gave me lots of knowledge about linux, bash scripting and linux software.
- I designed (with Plant UML) and developed a program in python that continiously searched for updates and transferred updated git and artifactory data to different security environments within SAAB.
- I have worked alot with small webservers (python-flask) to setup api's between systems and I have created e.g. a Mattermost bot. I have also worked with certifications and reverse proxies such as NGINX.
- I have worked alot with docker/podman and docker compose to setup local servers. I have also setup servers in k8s.
- I have built containers for generic purposes and specific containers with python programs in them.
- I have worked with setting up Jenkins pipelines, that fetches data, builds data, tests data via unittests and then run static code testing (sonarqube).
- I have worked with Scrum and with Kanban.
- I have worked with continiously supporting the software that i have helped develop and setup.
- I have worked with export controlled and nationally classified information.

IT-support
Telia   Gothenburg, Sweden   Dec 2019 - June 2020

- I worked in the Technical Support department with customers over the phone, mainly helping customers with problems surrounding their fiber broadband connection and mobile phone services.
- This job gave me knowledge about how to professionally work with customers and colleagues over digital communication.
- The job also knowledge about customer service and working with support systems.

EXTRAS

Beyond working and being intrested in IT and software development I have worked many jobs during my semesters. I have worked with renting out and setting up tents many summers (Kikiriki AB), This was a job where I had to meet new customers all the time and drove around Gothenburg in a boxtruck. I have worked with customer service at Biltema AB in Hisingsbacka in Gothenburg. I have worked as a referee in floorball.

I have also studied Jazz in Geijer Skolan in Ransäter, Sweden. I mainly studied jazz guitar and played with a small acoustic ensamble and in a big band where i played lead electric guitar.

PERSONALITY TRAITS

Curious   Responsible   Patient
Analytical   Persistent   Loyal   Direct

COGNITIVE SKILLS

- **80%** Adaptability
- **70%** Work under pressure
- **75%** Multitasking
- **90%** Logic and reasoning

STRENGTHS

Skill	Rating
Software development	●●●●●
Linux and bash scripting	●●●●○
